

MANOJ PANT

Senior Product Manager / Technical Product Manager with 10+ years of experience across HealthTech, FinTech, Telecom and Enterprise IT. Progressed from data and business analysis roles to leading AI-enabled product strategy, digital platforms, and enterprise product delivery. Expertise in Product Lifecycle Management, AI/GenAI use cases, Data Strategy, Product Discovery, Roadmap Planning, backlog management, BRD/PRD, user stories, API-first architectures, Agile delivery, stakeholder management, and data-driven product development.

PROFILE SUMMARY

- **Owned product vision, strategy, and roadmaps** for enterprise platforms, translating business needs, customer insights, and market opportunities into scalable capabilities aligned with strategic goals and measurable outcomes.
- **Led cross-functional product execution** across Business, Product, Data, Engineering, Design, and Operations, driving requirement alignment, solution definition, dependencies, prioritization, and delivery of product initiatives.
- **Managed the end-to-end product lifecycle** from discovery and problem validation through BRDs/PRDs, user stories, acceptance criteria, backlog prioritization, Agile delivery, UAT, release readiness, and product enhancement.
- **Identified and validated AI/GenAI opportunities** through POCs, pilots, and rapid prototypes using Microsoft Copilot, ChatGPT, Claude, and Figma AI for ideation, workflow optimization, solution validation, and product refinement.
- **Designed scalable API-first and cloud-aligned platforms** using modular architecture, microservices, integrations, and workflow capabilities, translating business requirements into technical solutions across enterprise ecosystems.
- **Applied data-driven product management** using SQL, Power BI, KPI frameworks, product analytics, and user insights to measure product outcomes, identify growth opportunities, evaluate adoption, and guide product decisions.
- **Managed competing priorities, risks, and dependencies** across complex enterprise environments, maintaining delivery governance, execution alignment, clear communication, and focus on measurable business outcomes.
- **Delivered domain-focused product solutions across FinTech and HealthTech** by translating complex business requirements into scalable workflows and technology-led enhancements aligned with customer needs and business goals.

CAREER TIMELINE

EDUCATION

- **MBA, Business Analytics**
Manipal Academy of Higher Education, 2026
- **BCA, Computer Program & Applications**
Mansarovar Global University, 2018
- **GNIIT Diploma, Software Engineering**
NIIT, Delhi, 2014

CORE COMPETENCIES

Product Strategy & Leadership

- Product Strategy
- Product Roadmap
- Product Discovery
- Product Prioritization
- Backlog Management
- Stakeholder Management
- Product Lifecycle Management

Product Requirements & Delivery

- Requirements Elicitation
- BRD / PRD Documentation
- User Stories
- Acceptance Criteria
- Process Flows
- UAT & Business Validation
- Release Management

AI, Data & Product Innovation

- AI Product Management
- Generative AI
- AI Use Cases
- AI POCs & Pilots
- Microsoft Copilot
- Data Strategy
- Product Analytics

Technical Product Management

- API-First Architecture
- API Integration
- Microservices Architecture
- Cloud-Native Platforms
- Workflow Automation
- System Architecture
- Enterprise Platforms

CERTIFICATIONS

- Microsoft Certified: AI Product Manager
- Google Certified: Project Management

WORK EXPERIENCE

12/2024 – 03/2026 | Senior Product Manager | M2P Solutions Ltd. | Mumbai | Hyderabad (Hybrid)

Responsibilities:

- **Owned product vision, strategy, roadmap, and multi-client delivery** for the Integrated Channels Suite, a 12+ application enterprise ecosystem supporting banking operations, payments, lending, and workflow automation across Banks and NBFCs.
- **Led end-to-end product lifecycle** from discovery and requirements through Aha-driven roadmap, backlog prioritization, user stories, acceptance criteria, Agile/Scrum, UAT, release management, and launch, improving execution efficiency by 25%.
- **Drove AI/GenAI product innovation** through GenAI use-case exploration and rapid prototyping using Microsoft Copilot, ChatGPT, Claude, and Figma AI, accelerating concept validation, requirement refinement, and feature prioritization by 15%.
- **Led product architecture and integration design** for modular, API-first, cloud-ready platforms supporting multi-tenant deployments, secure data processing, workflow automation, and integrations across banking and payment ecosystems.
- **Defined BRDs, PRDs, FSDs, API specifications, DFDs, ER models, process flows, and acceptance criteria**, translating business requirements into scalable technical solutions and improving delivery consistency across cross-functional teams.
- **Led cross-functional execution** across Product, Business, Engineering, UI/UX, Marketing, Sales, and Delivery, managing priorities, risks, dependencies, and release readiness to improve deployment efficiency by 25% across enterprise initiatives.
- **Delivered digital banking, lending, UPI collections, reconciliation, and regulatory integration capabilities** across CBS, NPCI, Credit Bureaus, GST, and CKYC/CERSAI ecosystems, reducing manual intervention by 20% through API-driven automation.

09/2024 – 11/2024 | Product Manager | Phoneme Solutions | Noida

Responsibilities:

- **Advised business stakeholders on product requirements, feature prioritization, and workflow optimization** for a CRM-enabled healthcare claims platform, aligning business objectives with scalable product capabilities and customer-focused solutions.
- **Developed PRDs, BRDs, user stories, functional specifications, and API integration requirements**, translating business needs into Agile deliverables, backlog priorities, and cross-functional collaboration across Business, Engineering, and QA teams.
- **Enabled AI-powered OCR product enhancements** by refining business workflows, validating functional requirements, and supporting secure, compliant claims processing to strengthen operational efficiency and product readiness.

03/2023 – 08/2024 | Product Manager | Ayu Health | Noida | Bengaluru (Hybrid)

Responsibilities:

- **Owned product strategy and roadmap** for the Doctor Business vertical, leveraging market research, competitive analysis, and business cases to identify opportunities, prioritize scalable products, and contribute to 2X business growth.
- **Led the end-to-end product lifecycle** from customer discovery and problem validation through requirements, user stories, backlog prioritization, Agile delivery, UAT, release coordination, and launch, reducing customer acquisition cost by 35%.
- **Conceptualized and launched Ayu DocConnect across Android and iOS**, leading 0→1 product development through discovery, validation, Figma prototyping, MVP definition, and launch, increasing active doctor adoption from 40% to 75%.
- **Led cross-functional execution** across Business, Engineering, UX, Marketing, Sales, and Operations, aligning product goals, priorities, releases, and stakeholders while communicating product performance and business insights to senior management.
- **Defined and optimized patient onboarding and Prior Authorization workflows** across 150+ network hospitals, translating insurance, TPA approval, coverage, bed availability, and IPD requirements into scalable product workflows and enhancements.
- **Drove product improvements across provider and patient journeys** spanning pre- and post-surgery workflows, translating TPA claims, post-authorization, documentation, billing, and discharge needs into product enhancements for post-acute care.
- **Built scalable payout and workflow automation capabilities** using rule-engine processing and cloud-integrated architecture, streamlining operations, reducing payout TAT from 10 days to 2 days, and improving platform efficiency and scalability.

01/2016 – 01/2023 | Nokia Networks | Noida

Growth Path:

01/2016 – 01/2019 | Reporting Analyst —————> 02/2019 – 01/2023 | Business Analyst

Responsibilities (Across the tenure)

- **Drove requirement discovery, backlog management, competitive analysis, and solution prioritization** across Agile programs, collaborating across 7 market regions and time zones to align global stakeholders and improve project success by 15%.
- **Developed enterprise analytics dashboards using Power BI and Tableau**, enabling real-time reporting, KPI tracking, performance visibility, and actionable insights for global stakeholders and leadership teams across enterprise programs.
- **Designed SQL-based reporting solutions and data workflows for enterprise datasets**, reducing reporting turnaround time by 25% while improving data accuracy, quality, operational efficiency, and reporting performance across business functions.
- **Defined BRD/FRD requirements for procurement and OSS/BSS order management using SAP Hybris**, collaborating with Engineering to deliver reporting, analytics, workflow automation, and scalable solutions aligned with business needs.
- **Built KPI frameworks, financial models, business cases, and data models** to evaluate opportunities, optimize budgets, assess business performance, strengthen executive reporting, and support strategic planning and decision-making.
- **Supported product enhancements and process improvements** through operational analysis, user insights, stakeholder feedback, KPI monitoring, and data-driven recommendations across Agile initiatives to improve business outcomes.
- **Led cross-functional collaboration across Business, Engineering, Sales, Operations, and Delivery**, coordinating priorities, budgets, handoffs, and global communication while strengthening Agile execution and improving productivity by 35%.

SELECTED PROJECTS ACROSS ORGANIZATIONS

Integrated Channels Suite (Digital Banking Platform) | 12/2024 – 03/2026 | M2P Solutions Ltd.

- Owned product vision, strategy, and roadmap for a multi-module banking platform integrating 12+ enterprise applications, addressing fragmented operations through API-first architecture, configurable workflows, and scalable deployments.
- Defined modular capabilities for secure integrations, workflow automation, cloud-ready deployments, and transaction processing, reducing integration complexity by 20% while improving scalability, interoperability, and operational efficiency.

LOS–LMS Platform (Loan Origination & Management) | 12/2024 – 08/2025 | M2P Solutions Ltd.

- Owned product roadmap and enhancements for Loan Origination and Management systems, addressing fragmented lending workflows through configurable onboarding, credit, disbursement, and repayment capabilities for multi-client banking.
- Defined PRDs, user stories, acceptance criteria, and workflow enhancements while aligning Business and Engineering teams, improving onboarding efficiency by 20% and strengthening scalable end-to-end lending operations across enterprise clients.

UPI-Based Payments & Collections Platform | 02/2025 – 09/2025 | M2P Solutions Ltd.

- Led 0→1 design and rollout of a UPI-based collections platform, addressing payment allocation and reconciliation challenges through configurable transaction workflows, automated processing, and scalable enterprise payment operations.
- Enabled API-driven payment automation and reconciliation workflows, reducing manual reconciliation effort by 20% while improving transaction efficiency, platform reliability, operational visibility, and user experience across enterprise collections.

Doctor Workflow & Engagement Platform (Ayu DocConnect) | 04/2023 – 02/2024 | Ayu Health

- Owned product strategy and platform delivery for Ayu DocConnect across 150+ hospitals, addressing fragmented doctor workflows through a cloud-enabled platform for onboarding, engagement, treatment operations, and workflow coordination.
- Launched the platform using customer discovery, Figma prototyping, analytics, and workflow automation, increasing active doctor adoption from 40% to 75% and reducing payout turnaround time from 10 days to 2 days through digital workflows.

Healthcare Prior Authorization & Patient Care Platform | 03/2023 – 08/2024 | Ayu Health

- Defined the Prior Authorization workflow for IPD patient onboarding across 150+ network hospitals, translating insurance, TPA approval, coverage limits, bed availability, and documentation requirements into structured product workflows.
- Drove product enhancements across provider and patient journeys spanning pre- and post-surgery care, incorporating TPA claims, post-authorization, billing, documentation, and post-acute support through nurses and healthcare staff.

Telecom Cost Optimization Platform | 10/2020 – 06/2022 | Nokia Networks

- Led a telecom cost optimization initiative addressing limited utilization visibility, defining KPI frameworks, reporting models, and performance metrics that enabled data-driven planning and improved enterprise process efficiency.
- Implemented automated reporting and operational workflows to reduce review cycle time by 30%, improving reporting accuracy, governance visibility, performance monitoring, and decision-making effectiveness across global delivery programs.

Enterprise Reporting & Insights Platform | 02/2019 – 07/2020 | Nokia Networks

- Built an enterprise reporting and insights platform addressing fragmented performance visibility, using Power BI and Tableau for KPI tracking, reporting automation, operational insights, and data-driven decision-making across global telecom programs.
- Automated reporting workflows and standardized enterprise dashboards, reducing manual effort by 30% while improving reporting efficiency and service delivery performance by 15% across global telecom delivery programs.

Network Rollout Financial Tracking & Monitoring | 04/2018 – 03/2019 | Nokia Networks

- Led network rollout financial tracking and monitoring initiatives, integrating operational and financial data to improve visibility into deployment costs, budgets, milestones, and variances across large-scale telecom programs.
- Developed reporting and KPI models to monitor rollout performance, identify cost and schedule variances, and provide actionable insights to global stakeholders, strengthening financial governance and data-driven delivery decisions.
